

# Construction Technology AAS

---

West Burlington Campus

## Program Information

The Construction Technology - Carpentry program combines the National Center for Construction Education and Research (NCCER) curricula with the Associate of Applied Science degree requirements, meshing illustrated instructional material with structured classroom activities. This program emphasizes four levels of carpentry, with each building on the previous level. During the summer term between the students' first and second year, a paid internship is required, giving students real-world experience with a local construction company. MAT-120 is required for transfer to a four-year university. A completed apprenticeship program may be substituted for CON-147, CON-148, CON-149, and CON-262. Students who have completed an apprenticeship approved by the Bureau of Apprenticeship & Training and the Iowa Department of Education will be allowed to articulate up to 29 credits after 12 credits of "C" or better are earned in the approved Construction Technology degree program at SCC. The Building Construction certificate is awarded after successful completion of first semester courses. The Building Construction diploma is awarded after successful completion of the first three semesters.
